SUMMARY

Motivated Software Developer with hands-on internship experience in developing web-based and database-driven applications. Proficient in PHP, JavaScript, MySQL, C, and C++, with a strong foundation in HTML, CSS, Bootstrap, DBMS, SQL, Object-Oriented Programming (OOP), and Data Structures. Successfully developed real-world projects including a **Multi-Level Smart Parking System** with automated vehicle entry/exit, real-time parking slot tracking, and revenue analytics. Passionate about building scalable applications, solving real-world problems, and continuously learning modern software development technologies.

TECHNICAL SKILLS

Programming Languages: C, C++, PHP, JavaScript

Frontend: HTML5, CSS3, Bootstrap, AJAX

Backend: PHP

Database: MySQL

Tools: VS Code, XAMPP, phpMyAdmin, Git, GitHub

Core Concepts: DBMS, OS, CN, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), SQL

WORK EXPERIENCE

Software Engineering Intern

12 June 2026 – 12 August 2026

Sorreals System Pvt. Ltd.

- Developed a web-based Multi-Level Smart Parking System using PHP, JavaScript, MySQL, HTML, CSS, and Bootstrap.
- Designed and implemented an automated vehicle entry and exit management system to reduce manual operations.
- Built a real-time parking slot tracking module for efficient space utilization.
- Developed database-driven modules for vehicle records, parking history, and revenue management.
- Collaborated with team members to design, test, debug, and deploy application features.
- Improved system reliability by implementing validation, database optimization, and efficient backend logic.

PROJECTS

- Multi-Level Smart Parking System** (Technologies: PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, AJAX)
 - Developed a web-based parking management system with Admin and Staff modules.
 - Implemented automated vehicle entry and exit management with receipt generation.
 - Built real-time parking slot tracking and revenue analytics dashboard.
 - Designed responsive user interface and optimized MySQL database operations.
- Digital No Dues Management** (Technologies: PHP, MySQL, JavaScript)
 - Built an online No Dues verification system for educational institutions.
 - Automated department-wise approval workflow and status tracking.
 - Reduced manual paperwork through centralized digital processing.
- Hostel Management System** (Technologies: PHP, MySQL, HTML, CSS, JavaScript)
 - Developed a web application to manage hostel student records and room allocation.
 - Simplified hostel administration through digital record management.

EDUCATION

Bachelor of Technology (B.Tech)

CGPA: 7.75

[2024-2028]

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Intermediate (12th)

69.6%

[2022]

Shri Prakash Intermediate College, Varanasi (SPIC)

High School (10th)

83.6%

[2020]

Shri Prakash Intermediate College, Varanasi (SPIC)

CERTIFICATIONS

- Software Engineering Internship Certificate – Sorreals System Pvt. Ltd.
- TCS iON – AI and Cyber Security Awareness
- TCS iON – Generative AI Essentials
